BREAST CANCER AWARENESS MONTH

**Screening Mammography
is a woman's best chance for
detecting cancer early.**

**Houlton Regional Hospital provides
digital mammography, which shows much more detail.**

**Two views of each breast are obtained and scanned
by CAD (computer aided detection) which
identifies calcifications, masses and other
breast asymmetries. The screening mammogram is
then reviewed by a board certified radiologist.
He or she may ask for additional mammographic
images or breast ultrasound to complete the
diagnostic assessment of the screening exam.**

**HOULTON REGIONAL
HOSPITAL**
20 Hartford St., Houlton

**Call our Digital
Mammography dept
at 207-521-2225**
